P302 NON-FLAM HIGH TEMP CONTACT ADHESIVE

DATA SHEET **Tensorutip**

As part of our Industrial range, P302 is suitable for standard laminate, foam and insulation.

PRODUCT DESCRIPTION

TensorGrip P302 is a non-flammable high performance industrial spray contact adhesive formulated for general contact bonding. Designed to deliver a smooth and strong bond in nearly any application while maintaining perfect non-flammable properties with leading Zero-Flam Technology.

BENEFITS

- > Non-flammable
- > VOC free
- > Excellent high coverage
- > 80% of final strength immediately
- Full strength in 24 hours

- > Fast. High Tack.
- Fast drying with long open time
- Good heat resistance (up to 220°F/105°C)
- Qualifies for LEED®-NC & CI EQ Credit 4.4: laminating adhesives shall contain no urea formaldehyde resins

DIRECTIONS FOR USE

TensorGrip P302 is designed as a portable, self-contained spray system for field or shop applications. Apply adhesive to both surfaces to be mated, at 80% to 100% coverage. Allow enough time (2-4 minutes or until dry to the touch) for the adhesive to become tacky before bonding. Parts should be mated with as much pressure as practical. Normal coverage required with web spray pattern is approximately 80%; however, porous surfaces may need a second coat. Initial bond is strong enough to allow cutting or trimming immediately, although ultimate strength is achieved in 1-3 days. Canister system will spray adequately above 60° F. Canister system should be kept in warm area. In the event that the canister gets abnormally chilled, freezes or gives poor or sputtering spray, it should be warmed up before continued usage. Warming canister by immersion in warm water is recommended. Notice!!! Do not store at temperatures over 120° F.

CANISTER STORAGE/CHANGE OVER:

- If you choose to leave the hose and spray gun on the canister, leave the valve on the canister open. Do not disconnect the hose/gun from the canister. Close and lock the spray gun.
- To change or disconnect canister: turn canister valve to the off position, spray out remaining adhesive left in the hose, disconnect the spray hose and gun from the canister.
- Reconnect the spray hose to a new canister of adhesive. OR if you are NOT connecting to a new canister, connect hose to canister of cleaning solvent (sold separately) and spray out until liquid is clear which indicates that the hose and gun is clean.

STORAGE & HANDLING

- Consult Material Safety Data Sheet prior to use.
- Do not store at temperatures over 120°F/50°C.
- Avoid exposure to direct sunlight.
- Do not store directly on concrete floor.
- Always store above 60°F/15°C
- When connected, keep valve open and hose pressurized at all times
- Always test our adhesives to determine suitability for your particular application prior to use in production
